

# Agile Final Project Checklist

- ☒ Create a new GitHub repository called "agile-final-project" and make sure that it is public.
- ☒ Create a workspace in ZenHub called "Final Project" that is linked to the repository.
- ☒ Create an issue template for the new repository like you did in the labs.
- ☒ Create issues for the stakeholder requirements listed above (10 in all). For now, just fill in the "As a... I need... So that..." section of the template.
- ☒ Move the issues that represent requirements 7 and 8 into the Icebox.
- ☒ Move the remaining issues into the Product Backlog.
- ☒ Conduct a Backlog Refinement meeting and rank the Product Backlog so that the stories match the requirements above in the order: 1, 2, 3, 4, 9, 10, 5, & 6.
- ☒ Update the top 5 stories in the Product Backlog with acceptance criteria following the Gherkin "Given... When... Then..." syntax.

Note: I also completed the Details and Assumptions because I'm unsure if assignment deliberately omitted them. (Top 5 stories are 1, 2, 3, 4 & 9).

- ☒ Create a "technical debt" label.
- ☒ Add labels to all the stories in the Product Backlog of either "enhancement" or "technical debt".
- ☒ Create a sprint milestone with a duration of 2 weeks, with the name "Sprint 1" in the title, and a sprint goal in the description.
- ☒ Conduct a Sprint Planning meeting.
- ☒ Add the top 4 stories to the sprint by assigning them to the sprint milestone.
- ☒ Assign story points estimates.
- ☒ Move these 4 stories to the Sprint Backlog.
- ☒ Simulate a sprint by assigning the top story to yourself.

#1

- ☒ Then move this story to the In Progress pipeline.

#1

- ☒ Move the story that you just assigned to yourself to Review/QA.

#1

- ☒ Take the next story from the Sprint Backlog and assign it to yourself.

#2

- ☒ Move it to the In Progress pipeline.

#2

- ☒ Move the story in Review/QA to Done.

#1

- ☒ Move the story from In Progress to Review/QA.

#2

- ☒ Take the next story off the Sprint Backlog, assign it to yourself, and move it to the **In Progress** pipeline.

**#3**

- ☒ Move the story that is left in **Review/QA** to Done.

**#2**

- ☒ Leave the story that is in the **In Progress** pipeline where it is.

**#3**

- ☒ This is the end of the sprint.

- This means **we never reached #4. It's still in the Sprint Backlog.**
- **Only 1 and 2 are DONE.**
- **3 remains In Progress**
- **9, 10, 5 and 6 (in that order) remain in the Product Backlog**
- **7 and 8 remain in the Icebox**

- ☒ Make sure that your burndown chart displays correctly.

- ☒ Share the URL of your kanban board for peer review. (Please click on "Invite your team" and copy the link which will be valid for 2 days. Please share this link as the URL of your kanban board for peer review.)
